

Quality Control

AAL is a full service analytical laboratory, focused on accurate results and excellent Quality Control. AAL performs all studies and analyses in complete compliance with CGM/GLP regulations, as well as meticulous adherence to our own stringent QA/QC guidelines.

Confidentiality

Included in our QC procedure is an emphasis on confidentiality. We know how important your products and formulas are to you and you can be assured that discretion is a priority with us.

Accountability

Accountability is also important to AAL. Our laboratory's computer system has been designed for accuracy and tractability of laboratory documentation. Our computerized tracking system includes data on each sample from the moment it arrives at our office, until the results are released to you.

Our Staff

Our staff consist of skilled and experienced professionals with expertise in chemistry. AAL's professional team performs a wide range of chemical and instrumental analyses, using only certified procedures and state-of-the-art instrumentation.

Adamson Analytical Laboratories, Inc.

FDA Registration # 203073-0

Personal Care And Cosmetics Testing

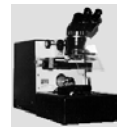

At AAL, we test many different kinds of cosmetics and personal care products. From sunscreen, skin care, oral care, to lip balms, mascara and eye shadows, we have you covered! We offer a full range of test for any product you wish to have analyzed, whether it is a raw material or a finished product ready to be distributed. Most of the common testing analyzed in our personal care products service include the following:

- ❖ Aloe Vera
- ❖ Benzoyl Peroxide
- ❖ Chlorxylenol
- ❖ Co Enzyme Q-10
- ❖ Collagen
- ❖ Colloidal Oatmeal
- ❖ Color APHA
- ❖ Cyclomethicone
- ❖ Dimethicone
- ❖ Formaldehyde
- ❖ Glycerin
- ❖ Hydrocortisone
- ❖ Hydroquinone
- ❖ Progesterone
- ❖ Retinol
- ❖ Salicylic Acid
- ❖ Stannous Flouride
- ❖ Sodium Flouride
- ❖ Sodium Monoflouride
- ❖ Potassium Nitrate
- ❖ Sulfur
- ❖ Sunscreen Actives (Octyl Methoxycinnamate, Octyl Salicylate, Oxybenzone, Parsol-1789, etc.)
- ❖ Titanium Dioxide
- ❖ Zinc Oxide
- ❖ And More...

Regulatory Compliances

In addition to our own strict guidelines, our lab conducts analysis only under approved USP, BP, EP, AOAC, and FCC methods. AAL is also licensed with the DEA, which allows us to be able to test steroids, controlled drugs, etc. Most importantly, we are registered with the FDA. Along with these outside compliances, we hold ourselves to the highest of standards concerning accuracy, cleanliness and confidentiality.

Equipment

We use only the most state-of-the-art instruments to provide precise, timely results. AAL currently has 15 HPLC and 4 GC systems. With these instruments we can do everything from anti-bacterial testing to vitamins and chromatographic purities. Our stability testing equipment consists of 25°C/60% RH and 40°C/75% RH ovens that are FDA compliant to ensure that the shelf-life will always be correct.

Pricing

All of our prices are based on a 5 to 7 working day turn-around service. For a fee, we can have your results on a 24, 48, 72, or 96 hours rush service.

Also a same day rush service is available, depending on the type of analysis being performed. We offer reasonable prices so that even the smallest companies can meet their budgets.

We also offer discounts for multiple samples of the same analysis. However, the samples must be sent in at the same time. We are growing and adding more tests everyday, so for an exact price on an analysis, please give us a call and we would be delighted to give you a quote.

Pharmaceutical Testing

At AAL, we test many different kinds of pharmaceuticals. From prescription drugs to over-the-counter drugs and raw materials, we have you covered! Along with these products we also offer excellent ingredient testing. We have the capability to test a full range of samples including tablets, capsules, creams, gels, cough syrup, anti-bacterial products, sprays and powders! Some of the most popular testing our clients' request consist of the following:

- ❖ Acetaminophen
- ❖ Albuterol Sulfate
- ❖ Ampicillin
- ❖ Bacitracin
- ❖ Benzalkonium Chloride
- ❖ Bromopheniramine
- ❖ Chlorhexidines
- ❖ Chlorpheniramine Maleate
- ❖ Chlotetracycline
- ❖ EDTA Content
- ❖ Ethanol
- ❖ Lidocaine HCl
- ❖ Neomycin
- ❖ Pseudoephedrine
- ❖ Tetracaine HCL
- ❖ Tretinoin Gel
- ❖ Undecylenic Acid
- ❖ And More...
